

Onboarding Workflow Plan

Project: KelpieBooks

Phase 1: Identity

Establish the primary user credentials.

- Email & Password input.
- Secure password hashing (Argon2).
- User record creation in Postgres.

Phase 2: The Organization

Define the financial entity.

- Capture legal name.
- Create `organization` record.
- Link User to Organization via Foreign Key.

Phase 3: Chart of Accounts

Initialize the ledger structure.

- Selection of industry-specific COA templates.
- Bulk insert of hierarchical accounts.
- Assignment of `system_tag` for essential accounts.
